PROFESSIONAL SUMMARY

Computer Engineering graduate with one year of software development internship experience building full-stack applications using Next.js, TypeScript, NestJS, Prisma, and PostgreSQL. Hands-on experience developing responsive web interfaces, REST APIs, database functionality, API integrations, debugging, testing, and Git-based workflows. Also experienced with mobile and blockchain projects. Seeking junior Software Developer, Full-Stack Developer, Frontend Developer, or Backend Developer opportunities.

PROFESSIONAL EXPERIENCE

Software Development Intern

Jan 2025 - Jan 2026

LoopTechnology — Cameroon

- Developed a full-stack RSVP Event Management System using Next.js, NestJS, TypeScript, Prisma, and PostgreSQL.
- Built responsive frontend features and user interfaces using Next.js and TypeScript.
- Developed backend services and REST APIs using NestJS.
- Connected application features to PostgreSQL using Prisma and managed database operations.
- Worked across frontend, backend, and database layers to deliver application features.
- Tested, debugged, and troubleshoot application issues based on project requirements.
- Used Git and GitHub for source control and collaborative development.

PROJECTS

CertiVERIFY — Blockchain Certificate Verification System

Ethereum · Sepolia · Web3 · Next.js

- Developed a blockchain-based certificate issuance and verification platform.
- Implemented wallet authentication and blockchain-based certificate records.
- Added QR-code verification to allow users to verify certificate authenticity.

ID Finder — Full-Stack Web Application

Next.js · TypeScript · Prisma · PostgreSQL

- Developed and deployed a full-stack web application using Next.js and TypeScript.
- Implemented database functionality using Prisma and PostgreSQL.
- Built responsive interfaces and integrated application functionality across the application.

Balm of Gilead Institute — Web Application

Next.js

- Developed and deployed a responsive website for an organization.
- Built reusable components and responsive layouts.

Med Clarity — Web Application

Next.js

- Developed and deployed a responsive web application.
- Applied modern web development practices and Git-based workflows.

Weather Application — React Web Application

React · JavaScript · API Integration

- Built a weather application using React and JavaScript.
- Integrated an external API to retrieve and display weather information.

Car Diagnostic Application — Mobile Application

Flutter · Dart

- Developed a mobile application using Flutter and Dart.
- Built user interfaces and application functionality for vehicle diagnostic use cases.

EDUCATION

Bachelor of Engineering (B.Eng.), Computer Engineering

2022 - 2026

University of Buea
