PROFESSIONAL SUMMARY

Computer Engineering graduate with one year of software development experience and hands-on training in manual testing, automation testing, API testing, web testing, and Selenium. Comfortable reviewing requirements, designing test cases, executing functional and regression tests, identifying defects, and validating APIs and database behaviour. Technical background in JavaScript, TypeScript, SQL, PostgreSQL, Postman, Git, and full-stack development. Seeking junior QA Tester, QA Analyst, Software Tester, or Junior QA Engineer opportunities.

PROFESSIONAL EXPERIENCE

Software Development InternJan 2025 - Jan 2026

LoopTechnology — Cameroon

• Worked on a full-stack RSVP Event Management System built with Next.js, NestJS, TypeScript, Prisma, and PostgreSQL.

• Tested and debugged application features across frontend, backend, API, and database layers.

• Investigated application issues and verified expected behaviour against project requirements.

• Performed testing after changes and fixes to confirm that functionality worked as expected.

• Worked with Git and GitHub as part of the development workflow.

• Collaborated on application development while troubleshooting functional and technical issues.

QA PROJECTS

ID Finder — Full-Stack Web Application

Next.js · TypeScript · Prisma · PostgreSQL

• Developed and deployed a full-stack application with frontend and database functionality.

• Provides practical coverage for functional, API, database, regression, and end-to-end testing.

CertiVERIFY — Blockchain Certificate Verification System

Ethereum · Sepolia · Web3 · Next.js

• Developed a certificate issuance and verification platform with wallet authentication and QR-code verification.

• Provides practical testing areas including authentication, validation, authorization, and end-to-end workflows.

Balm of Gilead Institute — Web Application

Next.js

• Developed and deployed a responsive website.

• Provides practical coverage for functional, usability, responsive, and compatibility testing.

Weather Application — React Web Application

React · JavaScript · API Integration

• Built a React application using an external API.

• Worked with API-driven application behaviour and data displayed in the user interface.

EDUCATION

Bachelor of Engineering (B.Eng.), Computer Engineering2022 - 2026

University of Buea
